## MR. DEREK CHEONG

President  
Timcare Biotech SDN BHD  
Kuala Lumpur, Malaysia

Sir:

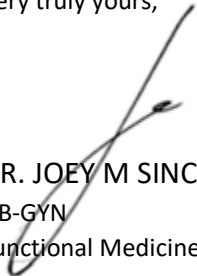

I am pleased to report to you our successful experiences including some of our clinical trials using Nanonized Zinc Hygiene Solution since the last two years.

The applications we have done for Nano Zinc are as follows:

1. As antiseptic agent prior to surgical operation
2. Post-operative antiseptic solution after minor surgery example: circumcision
3. Pre and post-operative antiseptic and wound care after dental procedure
4. As throat spray for patients with tonsillitis and tonsillopharyngitis
5. Wound care solution for the following conditions: poxvirus infection, burns, severe acne, fungal infection, diabetic foot and rashes (please find attached picture before and after 3 days of application)
6. As disinfecting solution for hospital Operating Rooms, Delivery Room, ICU, ER, Covid wards, Doctors' clinics, food and beverage facilities, nursing facilities, offices.

We are currently conducting trials for Nano Zinc feminine solution and deodorant spray as part of our cosmetic line. We will be happy to report the outcome to you as soon as possible.

Very truly yours,

DR. JOEY M SINCHIOCO  
OB-GYN  
Functional Medicine
